

WHO WANTS TO GO TO EUROPE?

EVIDENCE FROM MOROCCO, UKRAINE, AND TURKEY

By

Ahmet İçduyu, Koç University
Hüseyin Alptekin, University of Texas at Austin
Deniz Sert, Koç University

European Population Conference 2012, 13-16 June Stockholm, Sweden

DEPENDENT VARIABLES

Dependent Variables	Levels
Attitude to migrate to Europe	dummy with yes/no choices
Intention to migrate to Europe	dummy with yes/no choices

INDEPENDENT VARIABLES

Independent Variables	Levels
Gender	male vs. female
Age	continuous: 17 to 40
Education level	continuous: 0 to 23
Employment status	employed, unemployed, not seeking
Marital status	single vs. married
Migration experience	dummy with yes/no choices
Migration network	continuous: 3 to 6
Pull factors	continuous: 19 to 95
Political push factors	continuous: 2 to 10
Economic push factors	continuous: 12 to 60
Foreign language	dummy with yes/no choices
Having modern values	continuous: 5 to 25
Life satisfaction	continuous: 4 to 20
Urban/rural	urban vs. rural
Country	Morocco, Turkey, Ukraine
Research area	HER, LER, IMR, HRR

THE METHOD

- Data from the project entitled 'Imagining Europe from the Outside, EUMAGINE' (EC FP7)
- Research conducted in four countries: Morocco, Senegal, Turkey and Ukraine
- Field research follows a mixed-method approach:
 1. ethnographic fieldwork in the community
 2. a large-scale quantitative survey (500 in each research area, 4 research areas in each country, i.e., a total of 8000 surveys)
 3. semi-structured qualitative interviews (20 in each research area, 4 research areas in each country, i.e., a total of 320 interviews)

THE AIM OF THE STUDY

- To assess the dynamics and mechanisms behind the aspirations of people to migrate to Europe from Morocco, Turkey, and Ukraine
- To compare and contrast regional migration characteristics that influence migration patterns within these three countries
- To underline associations and more specific causal linkages between variables assessed via bivariate and multivariate analyses

THE REGIONS

- In each country, fieldwork is undertaken in four diverse regions:
 1. An area characterized by high emigration rates (HER);
 2. A comparable socio-economic area with low emigration (LER);
 3. An area with a strong immigration history (IMR);
 4. A location with a specific human rights situation (HRR).
- For this paper, we are focusing on three countries: Morocco, Turkey and Ukraine.

COUNTRIES AND RESEARCH AREAS

Research Area in/of	HER	LER	IMR	HRR
Morocco	Todra Valley	Central Plateau	Tangier City	Tounfite Region
Turkey	Emirdağ	Dinar	Fatih	Van Merkez
Ukraine	Zbarazh	Znamyansky	Solomyansky	Novovodolaz'ky

SURVEY

- A stratified cluster sample with random walks
- Target population of 18-39 year olds for the villages and urban neighbourhoods
- Questionnaire had:
 - Household grid
 - Individual interview
 - Close family members
 - Migration aspirations and intentions
 - Perceptions on country, life, migration, Europe
 - Individual variables
 - Transnational social practices
 - Household socio-economic situation

MOROCCO

MIGRATION HISTORY AND CHARACTERISTICS

- 1900 – mid-1970s: traditional model of the Maghrebi migrations
 - Emigration from Morocco mainly of working laborers,
 - Generated by the French colonial system
 - Mostly headed to France
 - Mostly men
- Late 1970s: closing of Europe and family regroupings
 - New destinations like Spain and Italy
 - Beginning to see clandestine migration, women, and professionals
- 1990 – 2000: a traffic jam between the Maghreb and Europe
 - geographical dispersion of the Moroccan emigration
 - a new reality of the transnational networks (economic and social) and migratory circulation
- Currently: diametrically opposed flows of South-South and North-South
 - Undocumented or irregular migration of Sub-Saharan Africans to Europe
 - Morocco becoming a transit country
 - Europeans' immigration to Morocco

TURKEY

MIGRATION HISTORY AND CHARACTERISTICS

- 1923-1960s: Creating the Turkish nation-state
 - the mass departure of non-Muslim minority populations (e.g., Greek Orthodox Christians to Greece)
 - the influx of those Turkish Muslim populations from the Ottoman Empire (especially the Balkans) that were left outside of the borders of the Republic
- 1950s-1970s: Labor emigration to Western Europe
 - Motivation for Turkey: an opportunity to decrease their rate of unemployment; develop its economy through emigrant; 'guest workers' would come back to Turkey with new skills and help transform its agricultural economy into an industrial one
- 1960s and 1990s: Diversification of labor emigration and Turkish asylum seekers
 - Oil crisis; end of the Cold War; Kurdish conflict and asylum
- Since 1979: Becoming a country of transit and destination
 - Diverse immigration profile: asylum seekers and refugees, irregular transit migrants, irregular labor migrants, professionals, sun migrants

UKRAINE

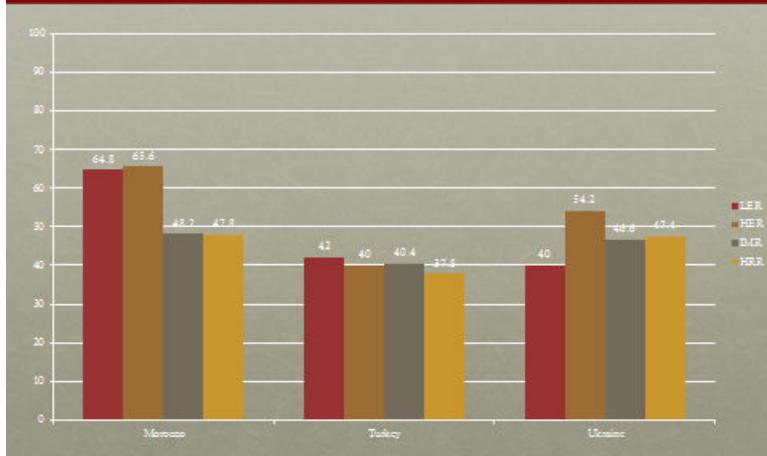

MIGRATION HISTORY AND CHARACTERISTICS

- Pre-Soviet period: Foreign rulers, Lithuania and Poland, the Ottoman Empire, Germany, the Austro-Hungarian Empire, Tsarist Russia
 - Population movements made Ukraine a multi-ethnic and multi-religious population, while domestic turbulences led to high rates of emigration
 - First waves to USA, Canada, South America
- During the Soviet period: forced migrations and emigration to particularly to Russia and the oil producing Soviet Republics in the east, such as Kazakhstan
- 1991 Independence: reverse and return migration
 - Russians and Belarusians moved out of the Ukraine,
 - Ukrainians, Tatars returned from Kazakhstan and Uzbekistan
 - First refugees
 - East Ukrainians tended to move east, i.e., to Russia; west Ukrainians with the exception of Zakarpattya tended to move westwards – pattern changed over time and east-west movements lost its relevance after 1994

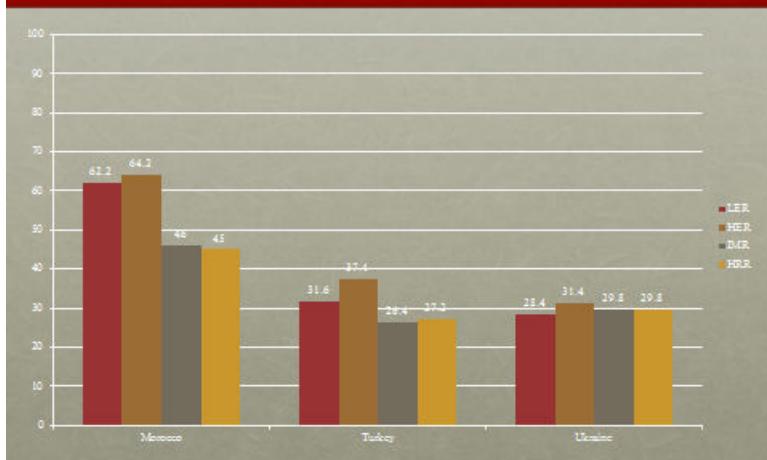

CASES: OVERVIEW

Country	Morocco	Turkey	Ukraine
Capital	Rabat	Ankara	Kyiv
Government Type	Constitutional Monarchy	Democratic Republic	Republic (Semi-presidential)
Surface Area (km²)	710,850	780,580	603,628
Population (Total)	31,513,555	72,561,312	45,871,738
Sex Ratio (male/female)	0.97	1.01	1.06
Population (15-44)	52.68%	67% (15-64)	43% (15-44)
Literacy Total (%)	59.5% (2008)	89%	99.4%
Literacy (Male/Female)	71.4%/48.1% (2008)	96% / 81% (2008)	99.7%/99.2% (2001)
Unemployment rate	9.10%	14.00%	9.6% (2009)
Net Migration Rate	-2.9‰	0.56‰	-0.11% (2009)
Remittances as % of GDP	7.70% (2008)	0.15%	5.0% (2009 est.)
GDP per capita (at 2000 US\$)	2,872 (2008)	8,248.3 (2009)	6,914 (2009)

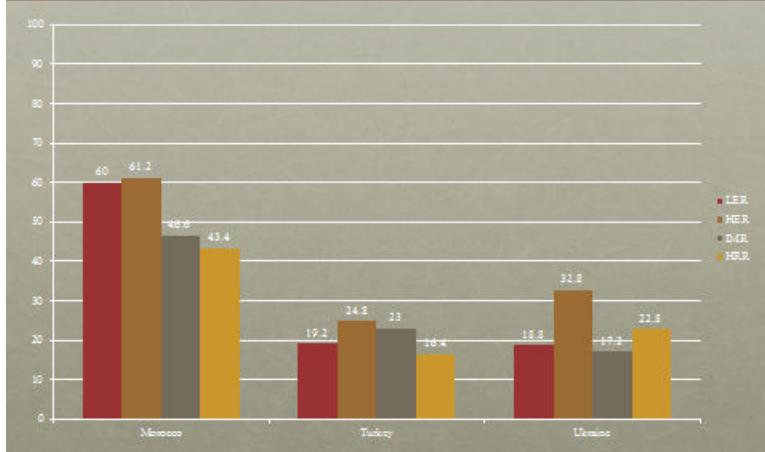

ATTITUDE TO MIGRATE ABROAD (%)
(If had the opportunity, would you like to migrate abroad in the next five years?)

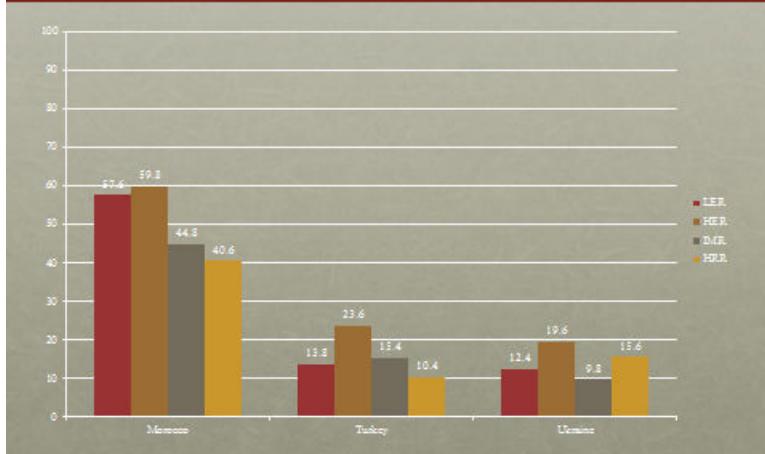

ATTITUDE TO MIGRATE TO EUROPE (%)
(If had the opportunity, would you like to migrate to Europe in the next five years?)

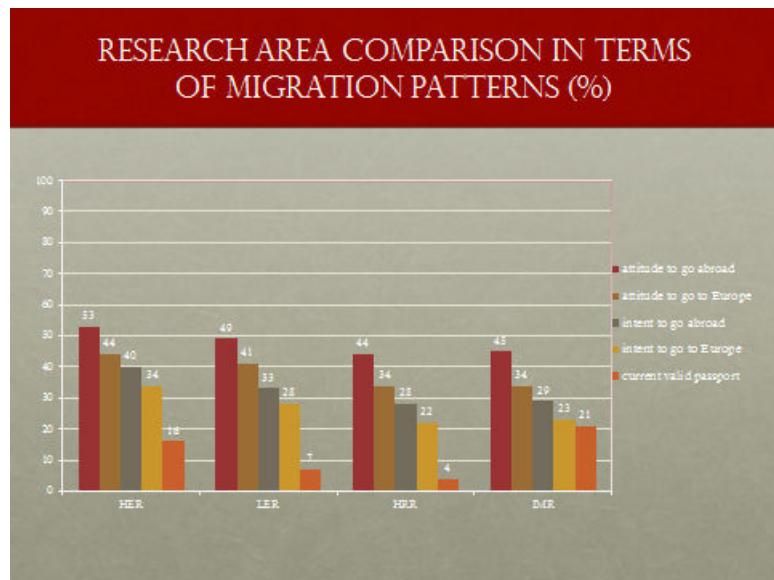

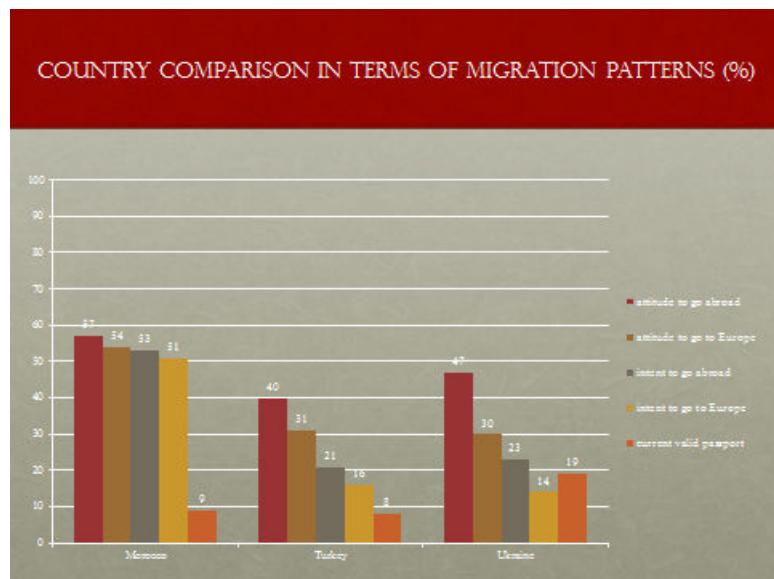

INTENTION TO MIGRATE ABROAD (%)
(Will you try to migrate abroad in the next five years?)

INTENTION TO MIGRATE TO EUROPE (%)
(Will you try to migrate to Europe in the next five years?)

CONCLUSIONS FOR MIGRATION ATTITUDE TO EUROPE

(Based on logistic regression output)

- Determinants of positive migration attitude to Europe:
 - Gender (being male rather than female)
 - Marital status (being single rather than married)
 - Migration network
 - Pull factors
 - Economic and political push factors
- Determinants of negative migration attitude to Europe:
 - Age
 - Education level
 - Level of life satisfaction
- Ranking of country effects (from positive to negative) on migration attitude to Europe (in terms of B-coefficient):
 - Morocco, Ukraine, Turkey
- Ranking of research area effects (from positive to negative) on migration attitude to Europe (in terms of B-coefficient):
 - HER, LER, IMR, HRR

CONCLUSIONS FOR MIGRATION INTENTION TO EUROPE

(Based on logistic regression output)

- Determinants of positive migration intention to Europe:
 - Gender (being male rather than female)
 - Employment status (being unemployed rather than employed)
 - Marital status (being single rather than married)
 - Migration experience
 - Migration network
 - Pull factors
 - Economic push factors
- Determinants of negative migration intention to Europe:
 - Age
 - Level of life satisfaction
 - Residing in an urban area
- Ranking of country effects (from positive to negative) on migration intention to Europe (in terms of B-coefficient):
 - Morocco, Ukraine, Turkey
- Ranking of research area effects (from positive to negative) on migration intention to Europe (in terms of B-coefficient):
 - HER, LER, IMR, HRR
